SUMMARY

A software engineering graduate from Coding Temple, deeply passionate about crafting impactful web applications. Seeking to leverage skills in both front-end and back-end development as a Full Stack Developer to contribute positively to the tech landscape.

SKILLS

Languages: HTML, CSS, Python, SQL, JavaScript, TypeScript.

Technologies: GitHub, PostgreSQL, Flask, Node JS, Bootstrap, React.

PROJECTS

Capstone

Gig Trakr

A platform automating gig payment management for DJs and promoters, streamlining processes and enhancing efficiency in the music industry.

Technology

Weather API

A website highlighting the capabilities of retrieving data from the open weather API to present the forecast based on user input, whether it be a city name or ZIP code.

EDUCATION

8/2023 - 10/2023

Certificate in Software Engineering

Coding Temple

Successfully finished a 10-week immersive program focused on acquiring essential and relevant technologies widely utilized in the contemporary workforce.

2010 - 2015

Studies in Audio Engineering and Sound Design

Michigan Technological University

Successfully navigated a rigorous 5-year academic journey, concurrently pursuing studies in audio engineering and sound design, all while managing a part-time job.

2008 - 2010

Associate's Degree in General Studies

Landmark College

Completed a comprehensive two-year program in general arts, establishing a strong educational foundation.

EXPERIENCE

8/2023 - 10/2023

Coding Temple's Full-time Software Engineering Program

Coding Temple

- Completed a 10-week full-time coding bootcamp, mastering common programming languages and technologies while developing strong problem-solving skills.
- Successfully executed projects that met specified requirements, showcasing my ability to apply acquired knowledge in practical scenarios.

SQL / Excel

2020 - 2022

Livestream Videographer

Boxless Media

- Managed livestreams and recordings of various events such as press conferences, charity events, and funerals.
- Engaged in post-production editing of photo, video, and audio content to produce refined final deliverables.

OBS / Adobe Premiere

2019 - 2020

Court Reporter/Digital Videographer

Planet Depos

- Proficiently captured audio and video for depositions, hearings, and trials, ensuring seamless equipment setup in diverse scenarios.
- Met strict timelines for audio and video recordings in legal settings, maintaining precision and quality throughout.
